

## The Danish Army NCO Academy's Use of Lightweight Simulation Before Field Training

**Release Date:** Wednesday, 11 December 2019

**Premiere Time:** 1000-1100 (EST)

(Webcast will remain open online for one week following the premiere time)

**Speakers:** WO II Bob Ludvigsen

(Royal Danish Defence College and Denmark ADL Partnership Center)

**Subject:** In this webcast the Danish Army NCO Academy will provide background information on their current simulation project, in addition to a short demonstration. The demonstration will focus on how students interact with the simulator and how feedback is provided to the students. Furthermore, the instructor will introduce potential approaches for how they plan to collect xAPI data from the simulation.

**Audience:** Learning professionals, training specialists, IT professionals, and individuals who are involved in low-level tactical training in the field.

**How:** Virtual and on-demand. Use the link below to register and receive access to the webinar any time between Wednesday, 11 December at 1000 (US EST) and Tuesday, 17 December 2359 (US EST). Please note that the webinar and link will remain live for 1 week following the premiere time. After that time, you can access the webinar through the ADL Initiative's YouTube page and adlnet.gov.

To access the webinar, select the link provided below where you will be prompted to enter your name and e-mail. This will register you and save your seat for 11 December and provide instructions for later "on-demand" viewings. Registering allows you to ask questions to the speakers during the presentation.

**Speaker Biography:** Bob Ludvigsen is a Warrant Officer II in the Danish Army, posted at the Royal Danish Defence College. He has 10+ years of experience in the area of Advanced Distributed Learning. Over the past 6 years he has specialized in developing games and simulations. He has successfully integrated xAPI into a simulation, making it possible to pull valuable learner data from the simulation.
