

# OPEN SOURCE

# Web-Based

# Simulation

no install  
no cost

**Virtual World Sandbox**

[www.ADInet.gov](http://www.ADInet.gov) • <https://sandbox.adlnet.gov>

## DEVELOPERS

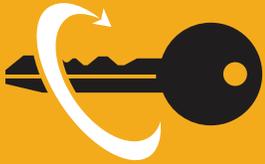

Author in JavaScript  
Collaborative development  
Reusable behavior code library  
All source code on GitHub

## DESIGNERS

Drag-and-drop content library  
Collaborative design tools  
Reusable multimedia library  
Detailed how-to guides

## TRAINERS

Multi-player training  
After-action review  
Detailed performance tracking  
No browser plug-ins required

### Turn-Key

- Fast deployment
- No customer install
- Cloud-based service

No software install required—not even browser plug-ins. Built on HTML5, the VW Sandbox lives in the cloud. Train, play, or author with any modern web browser.

*check out  
the demos*

### Free

- Government developed
- No licensing fee
- 100% open source

The VW Sandbox is free and open source, with no licensing fees or vendor lock-in. The source code is available to use, build into your own product, or host on your own server.

### Content

- Built-in multimedia
- Behavior library
- Use and share assets

Use the built-in community libraries to find 3D assets, behaviors, sounds, and video clips. Or build a private, custom library of your own commonly used elements.

### Community

- Active user community
- Ongoing updates
- Customer support

Engage with other users, file feature requests, or submit bug reports on GitHub, or visit the public-facing project plan on Pivotal Tracker where you can see plans, progress, and issues under development.
