TLA **PlugFest**

Congratulations to the inaugural TLA PlugFest 2022 graduates!

The ADL Initiative organized the "PlugFest" event on 22-23 June that brought together DoD decision makers, information technology (IT) managers, and distributed learning application vendors to learn more about the Total Learning Architecture (TLA), a collection of data standards, technical specifications, business rules, and policy guidance for integrating education and training technologies into a modernized DoD learning ecosystem. The TLA PlugFest featured hands-on demonstrations, tutorials, and plug-and-play interoperability testing, designed to assist DoD organizations to implement new TLA-compliant technologies.
