

NATO Standards for ADL in Exercises

Wednesday, 15 September 2021 | 1400-1500 EDT (U.S.)

Speaker: Aaron Presnall, Ph.D.

Overview: The NATO Training Group on Individual Training & Education Developments (NTG IT&ED) was tasked to develop a set of guidelines/recommendations for NATO/Partnership for Peace (PfP) member nations, compiling best practices for using e-learning to support personnel participating in collective exercises. Our webinar will discuss the first released draft of this new standards document and solicit feedback/questions from the stakeholder community.

Subject: Automated e-learning courses offer a proven solution for enhancing both the efficiency and effectiveness of a collective military exercise. But the operational integration of advanced distributed learning (ADL) into exercises remains sporadic and ad hoc. The maturation of ADL in exercises requires a formal recognition of best practices across the innovators in this field.

The NTG IT&ED effort to identify best practices for ADL in exercises will feature the production of an Annex to the NATO ADL Handbook, referred to in STANAG 2591 as the go-to official document for standards on digital learning.

Our webinar will discuss the first released draft of this new standards document.

Audience: Military and civilian education and training executives, exercise planners, operators, mentors, trainers, observers, and participants who want to gain insight on the implementation of NATO Standards for ADL in Exercises.
